

## Artificial Intelligence at Anderson University Vision Statement

As an internationally recognized\* higher education leader in innovative educational technology, Anderson University acknowledges its responsibility to equip students to successfully engage in a world context increasingly shaped by Artificial Intelligence (AI) technologies. Anderson University embraces the opportunities Artificial Intelligence presents, modeling responsible use while upholding standards of premier academic integrity in keeping with the University's core Christian values and exceptional academic rigor.

At Anderson University, we will:

- Equip faculty with opportunities to integrate meaningful AI conversations, tools, activities, or assignments into our students' coursework and academic programs.
- Empower students to harness AI resources with creativity, thoughtfulness, and professionalism.
- Advance academic rigor and foster the creative and critical thinking skills necessary for success both when using AI and when working independently of AI.
- Prepare students to critically assess AI's potential impacts on thinking, education, industry, faith, and society.
- Cultivate leaders who will use AI responsibly and guide its development through a lens of Christian principles and ethics, emphasizing character and virtue in moral philosophy and application.

Anderson University will produce graduates who are technologically adept, ethically grounded, and spiritually developed - leaders who will navigate technological advancement with discernment, confidence, and empathy.
